

Eduardo Tioma

Front-End software developer

📍 São Caetano do Sul, SP - Brazil

✉️ tioma.eduardo@gmail.com

I started programming in C# back in 2018 developing desktop applications, but in early 2021 [Next.js](#) showed me how easily I could build frontend (even fullstack) software. Since then I've been studying frontend development with [React](#) and [Next.js](#).

☑️ I'm close the end of my graduation in [Biomedical Engineering](#) at the Universidade Federal de Uberlândia. Even though I find many things about this field interesting, I feel happier coding and studying software development.

Grupo Alura

🔗 Front-End intern (Content Team)

- 🔗 I'm contributing to new courses about React and Next.js with TypeScript
- 🔗 I'll start writing articles about topics I find interesting about those technologies soon

NEXT.JS

Nov 2021 ~ now

🔗 Advanced Front-End Bootcamp (Next.js)

- 🔗 Spent 3 months dedicated to this bootcamp in which my primary responsibility was helping students and explaining concepts that they didn't quite understand with video lessons only. The main subject of the course was Next.js, but I also helped filling the gaps related to React and Front-End as a whole.
- 🔗 Every module (2 weeks), I wrote about problems the students could face and gave them tips about how they could solve them.
- 🔗 With the help of other interns, I reviewed student's projects and helped choosing which ones would be showcased.

JEST

REACT TESTING LIBRARY

July 2021 ~ Nov 2021

🔗 Scuba Team intern

- 🔗 Spent a few months just answering basic questions of HTML, CSS and JavaScript. I didn't go beyond the basics, but this taught me how to explain concepts in a simple manner for beginners to understand.
- 🔗 Studied React and Next.js when I could
